

**Provider Notification RE: Community Health Excellence (CHE) Responsive Grants Program - PacificSource** – Sunday, April 19th, 2020 8:38am

Dear Friends:

In light of the impact COVID-19 is having on our provider partners, PacificSource has suspended our 2020-2021 CHE Community Health Excellence (CHE) grants program. We are instead providing responsive grants through 2020.

**PacificSource CHE Responsive Grants** are available for eligible PacificSource providers to support clinic operations. Providers can apply for up to \$25,000 in CHE grant funding in response to COVID-19 needs, including staff, technical assistance, capital funds to adopt or expand telehealth services, or other clinic operations or program requests. Unlike the typical CHE application process, providers will fill out a brief online application, and evaluations will be conducted by PacificSource weekly. Decisions will be made on an on-going basis with a goal of disbursing awards within 2 weeks of approval. We will accept Responsive Grant applications until our 2020 CHE budget is exhausted or through December 2020, whichever comes first.

**Eligibility Requirements**

- Current contracted PacificSource provider or provider group
- Award benefits the grant applicant's patients, regardless of insurance status
- Urgent operation or program need due to the COVID-19 crisis

Please see application and additional information on our website: [CHE website](#)

**THANK YOU**  
to all the doctors, nurses,  
and healthcare workers.
